

Flow bd4d85723b4f141d96cde95c6aed3941f25ec1624ff9ecfe46bf8d0d6156e436

This flow lasted approximately two hours long and likely tranferred out a lot of data relative to many of the others in our data set. This flow was called with command globus-gridftp- and tranferred out 242213150037 data octets. We will first perform exploratory data analysis on the data transfer.

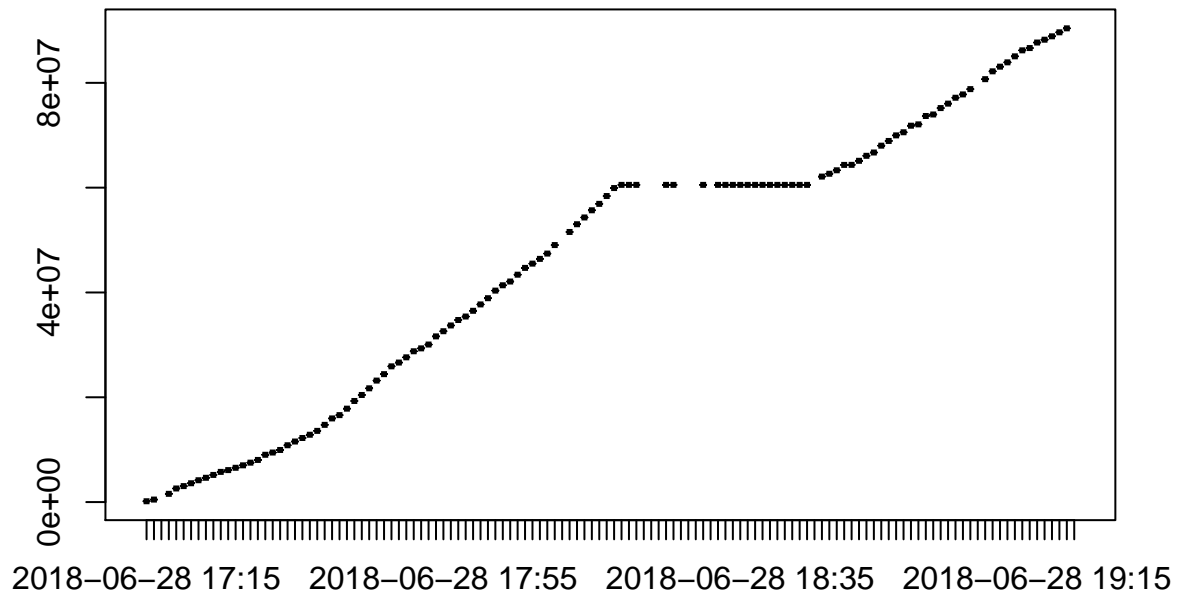

```
source("/Users/aaronkruchten/Desktop/Data Science Internship/PSC R interface.R")
flow_name = "'bd4d85723b4f141d96cde95c6aed3941f25ec1624ff9ecfe46bf8d0d6156e436'"
database = "ALL_PSC_br034.dmz.bridges.psc.edu"
explore_data_transfers(flow_name = flow_name,db = database)
```
